

Well Begun is Half Done !! - Aristotle

Create resume using L^AT_EX and using Git-hub for version control

e-Yantra Team

1 Introduction

This assignment is designed to get you acquainted with Git and Latex. You have to go through tutorials on Git and Latex. These tutorials can be downloaded from resource section of eYSIP-2015 piazza forum.

This assignment has two parts:

1. Create your resume in Latex
2. Use git and git-hub to do version control on latex file of your resume

Your resume will have different sections, as mentioned in section 2. You have to write each section of your resume and push the code on git-hub. Refer to section 3 for details on pushing codes on git-hub.

2 Creating Resume in Latex

- As First task install Latex software on your system.
- Go through the tutorials posted on eYSIP-2015 on Piazza forum.
- Feel free to use google for your assistance.

Your resume **MUST** contain following sections:

1. Name,Address,Contact information (Contact,e-mail), Photograph

- Including your photograph is **mandatory**.
- 2. Career Objective
- 3. Education
 - Create a **table** for entering information
- 4. Projects
 - Enlist all projects using enumerated list.
- 5. Training and Internship
 - Enlist all projects using itemized list.
- 6. Research Publication
 - Enlist all projects using enumerated list.
- 7. Technical Skills
 - Enlist all projects using itemized list.
- 8. Soft Skills
 - Enlist all projects using enumerated list.
- 9. Extra Curricular Activities
 - Enlist all projects using itemized list.
- 10. Co-Curricular Activities
 - Enlist all projects using enumerated list.
- 11. Personal Information
- 12. Reference
- 13. Declaration
- 14. Date

This is the minimum number of sections required. You can add extra section.

3 Using Git and Github

- Go through the tutorials posted on eYSIP-2015 on Piazza forum.
- Feel free to use google for your assistance.
- Install Git bash on your system and create account on git-hub (in case you do not have an account).
- Create a repository on your git-hub account and name it **yourname_Resume**
- You have to commit and push your latex project folder which must contain .tex file, .pdf file and other supporting files.
- You have to make commit after completing each section of resume as listed in section 2. This means you must have atleast **Fourteen (14)** commits.
- All commits must have a message describing the section updated.

4 Submissions

- repository url must be shared by **25th May,2015**. Students not uploading the resume by the deadline will not be consider for project discussion.
- Share your repository url on piazza forum.
- You will find a thread for sharing url on piazza.
